

Britton

Once I started working long hours overnight, it was difficult to find time to read like I wanted to. I was always skeptical of audiobooks, but I was convinced by a friend to give them a try. Of course he recommended *The Wheel of Time* to me, and it was an experience unlike any other. I never imagined someone could bring a story to life like that with only words, but it happened. I have listened to upwards of 20 audiobooks now, and I'm a huge fan (thanks in large part to Michael and Kate Reading). They truly changed how I experience books, as I'm sure they've done for so many others. Thank you so much
